

We want you to know we are assessing daily, any impacts to our guests and staff, and are monitoring advisories from the CDC, the World Health Organization, as well as the Minnesota Department of Health.

As always, we are committed to upholding the highest standard of cleanliness. We will continue to work closely with our various vendors to share best practices and the latest products that may be useful to combat the spread of COVID-19. We have intensified our cleaning protocols, and will continue to do so for the foreseeable future.

Here are just some of the steps we've taken.

We have increased the disinfecting of all surfaces that are high touch areas. All guest room television remotes, door handles and light switches will be sprayed with a disinfectant as our room inspectors leave the room for the last time. We have increased the amount of times our public areas are sprayed with disinfectant. Since disinfectants need a certain amount of contact time to effectively work, they are left to air dry, so you might encounter wet surfaces up to ten minutes after being sprayed.

We've added additional hand sanitizer stations in our public areas.

We are providing our employees with information on best practices and encouraging them to stay at home if they are not feeling well.

The CDC's Waterborne Disease Prevention Branch advising there is no evidence at this time that COVID-19 can be spread to humans through the use of pools and hot tubs. Proper operation, maintenance, and disinfection (e.g., with chlorine) of pools and hot tubs should remove or inactivate the virus that causes COVID-19.

We've also closed all public spaces, i.e. our pool, fitness room.

Please know that the well-being and safety of our customers and employees have always been a top priority at the Canal Park Lodge. If you have questions or concerns, please feel free to contact us at any time.

Thank you & stay healthy,  
Jim Paquette, General Manager  
Canal Park Lodge
